<b>PROCEDURE TITLE</b>	<b>RISK IDENTIFICATION, EVALUATION AND CONTROL</b>
<b>SCOPE</b>	This process starts from the identification up to controlling of risks as well as opportunities relative to the DILG Region's organizational context, needs and expectations of its interested parties and its QMS scope.
<b>PURPOSE</b>	To define the process of proper, accurate and effective determination, evaluation and control of risks.

**DESCRIPTIVE STATEMENT:**  
 This procedure starts from determining risks and opportunities considering the organization's internal and external issues, requirements of interested parties, scope of QMS and products and services. Then, a defined risk assessment criteria provides a basis for determining significant risks which require further control actions. An oversight review process ensures the reasonable accuracy and reliability of the risk assessment outputs, called Risk Registers. Further, control and opportunity plans are assessed for effectiveness prior to inclusion in existing QMS process and documents.

Step No.	Responsible Personnel	PROCESS/ACTIVITY	Details	References
1	Process Owner	Determine risks and opportunities	<ul style="list-style-type: none"> <li>Determine internal and external issues, both positive and negative, interested parties, objectives, processes and corresponding risks and opportunities as follows:               <ul style="list-style-type: none"> <li>Objectives</li> <li>Process</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>Context Registry</li> <li>Interested Parties Matrix</li> <li>Quality Objectives</li> <li>QMS Scope</li> <li>Risk Register</li> <li>Opportunity Management Plan</li> </ul>
2	Process Owner	Determine risk trigger, consequence, and existing control measures	<ul style="list-style-type: none"> <li>Determine:               <ul style="list-style-type: none"> <li>Risk trigger</li> <li>Potential effects/consequences of risk as well as opportunities, where applicable</li> <li>existing control measures, if any, to prevent the risk from happening, or treat and mitigate its effect/consequence.</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>documented operating procedures</li> <li>Risk Register</li> </ul>
3	Process Owner	Rate the risk	<ul style="list-style-type: none"> <li>Calculate the risk level or risk rating by estimating the severity of consequence and the likelihood of its</li> </ul>	<ul style="list-style-type: none"> <li>Risk Criteria Matrix</li> <li>Risk Register</li> </ul>

**Effect** – deviation from the expected, whether positive or negative  
**Consequence** – outcome of an event affecting objectives or controls

**Uncertainty** – the state of deficiency of information related to, understanding of, or knowledge of an event, its consequence, or likelihood

**Risk Register** – a documented information summarizing the results of the risk assessment

**Risk trigger** – a condition which causes the risk to occur

**Risk assessment** – process of estimating the magnitude of the effect of risk using a defined risk criteria to determine whether or not the risk is significant

**Risk criteria** – terms of reference against which risk is assessed by estimating its impact (severity or benefit) and likelihood of occurrence.

**Risk rating** – the magnitude of risk considering the impact of the effect and its likelihood

**Impact** – the severity (negative effect) or benefit (positive effect) of risk

**Severity** - the seriousness of the harm, impact or consequence of the risk

**Likelihood** – the probability of occurrence of the effect of risk

**Detection** – the probability that occurrence of risk can be detected early enough to enable proper responses to be initiated

**Existing Risk Control Measures** - modify the severity of consequence, likelihood or detection of risk

**Risk Treatment** – any action intended to modify or lower down the risk magnitude

**Significant risk** – a risk whose rating exceeds the threshold

**Opportunity** – a positive effect of uncertainty which may or may not require specific actions in order to pursue or realize; also refers to **benefits** or gains realized from the positive effect of risk
